A painting depicting three men in a industrial setting, possibly a factory or workshop. Two men in the center are examining a large sheet of paper, likely a blueprint or map, while a third man in a suit and hat stands to their right, holding a pipe. In the background, there's a large mechanical device with a gauge and pipes. The scene is framed by wooden structures on the left and right sides.

Note: The human capital index ranges between 0 and 1. The index is measured in terms of the productivity of the next generation of workers relative to the benchmark of complete education and full health. An economy in which the average worker achieves both full health and full education potential will score a value of 1 on the index. GDP = gross domestic product; PPP = purchasing power parity.
